## EDUCATION

### Bachelor of Computer Science

Instituto Universitario de Tecnología “Dr. Federico Rivero Palacio” Región Capital  
Caracas - Venezuela  
2010-2015

### Software Engineering Immersive

General Assembly, Sydney  
December 2021 - March 2022

## LANGUAGES

Javascript - Typescript / HTML / CSS / SASS  
NodeJS / Python / SQL

## FRAMEWORKS / TECHNOLOGIES

### TOOLING

React / Remix-run / React-Query / Express  
Flask / REST / GraphQL APIs / MongoDB  
Firestore / FHIR / Version Control (Git)  
Docker / Google Cloud Platform

## RELEVANT EXPERIENCE

### 33Bondi PTY - LTD

Software Engineer / June 2022 - Present

- Currently I'm leading numerous projects aimed at delivering highly scalable services within the healthcare sector across Australia. These services utilize FHIR for data standardization and safety, ensuring the efficient management of critical information. In collaboration with NSW Health, I am actively involved in developing integrative solutions that connect our services with theirs, expanding our reach and positively impacting the lives of countless Australians.

### Instituto de Previsión del Niño - Caracas

Fullstack Web Developer / DeC 2016 - Jan 2017 - Freelance Project

- As a freelance developer, I successfully designed and implemented a full-stack Appointment System for a non-profit organization. The system was built using Laravel, MySQL, jQuery, and Bootstrap, streamlining the process of scheduling appointments and enhancing overall efficiency for the organization.

### Representaciones Metamax, C.A.

Fullstack Web Developer / Sep 2015 - Nov 2016

- As part of a versatile team of 3-6 members, I collaborated on the development of robust full-stack applications. Our approach employed industry best practices, including RESTful APIs, microservices architecture, and Agile methodologies using Scrum. This ensured the delivery of high-quality, maintainable, and scalable software solutions.

### e-Business Corporation, C.A.

Fullstack Web Developer / May 2014 - Jun 2015

- I employed MVC best practices, PHP, and CodeIgniter to create clean, modular code, while utilizing RPC SAP for database connectivity. Additionally, I crafted engaging and dynamic UIs using jQuery and Bootstrap to deliver an outstanding user experience.

## LATESTS SIDE PROJECTS

### Ridly - Rubish Removal Services

Front-end Developer / Oct 2022 - Jan 2023

- I participated in the project to revamp their existing Webflow website. We rebuilt it using Remix Run, a server-side rendering solution for React, to enhance speed and SEO performance. Additionally, we leveraged Vercel's edge runtime technology to further optimize the site's responsiveness and user experience.

### Train Like a Ballerina

Fullstack Web Developer / Nov 2022 - Feb 2023

- I played a key role in redesigning the company's infrastructure, transitioning from WordPress to highly scalable services utilizing Google Cloud, GraphQL APIs, Node.js, TypeScript, and Nexus.js for enhanced performance and flexibility. We significantly improved the speed and efficiency of their online services, enhancing user experience and operational capabilities.
